

# #CryptoParty Berlin

Privacy is a basic human right.

On the Internet however this right is increasingly ignored, especially by many Companies and Governments that track us, log our online activity and even read emails on the way to their destinations.

Crypto Parties are a global movement in the interests of educating and empowering people to protect their privacy in the digital domain.

Come to the Berlin CryptoParty and learn how to be anonymous online. Learn how to avoid being tracked and ensure your online communications are not being read or manipulated in transit. Bring your computer or smartphone. All software used is free. There are no fees.

Weisestrasse 7

12049 NK

28 September. 19:00 until late.
